Impact-Rated Smart Glass

All doors feature triple-pane Low-E hurricane glass reinforced with a PVB interlayer, delivering 25mm of protection, energy efficiency, and clarity.

Handles

- All handles included with our doors are shown below. We can make your door with pull handles and a deadbolt or a double bore for thumb latch hardware.
- We manufacture our doors with pull hardware as they have a more distinct look, add style, and lend additional architectural interest by promoting elegance and beauty of the doors.
- If you do not want pull hardware, we can make your door with a double bore for standard thumb latch hardware.

Product Warranty Overview

At APX Tile & Distribution, we take pride in crafting products built to last. Every door is handcrafted, which means each piece is unique. We stand behind our work and want you to feel confident in your purchase. Below is a simple overview of what your warranty includes.

Door Warranty

Your door is covered for 5 years against defects in materials or workmanship when installed according to APX guidelines.

Paint & Finish Warranty

The factory-applied paint finish is protected for 2 years against cracking or peeling. Handle finishes are covered for 6 months, as normal use may cause minor wear. Touch-up kits are included for easy maintenance.

Glass Warranty

Insulated and hurricane-rated glass is warranted for 2 years against seal failure. Please note:

- Low-E glass may naturally appear slightly wavy
- Minor scratches or marks that do not affect visibility are normal
- Replacement glass is covered, but installation labor is not

What Isn't Covered

This warranty does not cover:

- Damage from improper installation or storage
- Chemical spills, tape residue, paint, or construction materials
- Wear from pets, accidents, or misuse
- Salt corrosion, especially in coastal areas
- Alterations or repairs by unauthorized third parties
- Damage from storms or other natural events

Shipping damage must be reported within 24 hours of delivery.

Important Care Tips

Proper care helps protect your door and maintain your warranty.

Cleaning: Use mild soap, water, and a soft cloth. Avoid harsh or abrasive cleaners.

Hinge Care: Grease hinges annually for smooth operation.

Cleaning Frequency:

- **Inland homes:** once a month
- **Coastal homes:** once a week (salt can damage the finish if not removed regularly)

Climate Notes

If you live in an area with long periods below 40°F, we recommend choosing a thermally broken door to prevent frost or condensation.

Electronic deadbolts may affect proper sealing and are not covered under warranty if issues arise.

Overhang Recommendation

To help protect your door from direct sun and weather, we recommend an overhang that extends at least half the height of the door.

Installation & Warranty Approval

If APX installs your door in Florida, a final inspection and sign-off ensure it is damage-free at installation. Any damage occurring afterward is not covered.

All warranty claims must be reviewed and approved by APX Tile & Distribution. Warranty decisions are made at our discretion.
